- Web Based – No software to install.
- Reduce paper usage.
- Tracks employee work history.
- Fully Integrated with Jonas Payroll / Accounting.
- Control and restrict who is able to log hours.

Automate your company's payroll process with Jonas e-Timesheet Services, a web based solution for logging labor hours remotely. Hosted by Jonas – so there's no software to install or maintain – the online labor time entry system is an easy-to-use and efficient system to help you manage your most valuable resource – your staff.

This addition to Jonas will benefit those contractors that have remote crews or service people with a need to report time to a centralized payroll. In addition to promoting a paperless work environment there are a number of other benefits to an online payment process, many of these features and benefits are outlined below.

Features	Benefits
Payroll Entry Permissions	Users can only enter to designated: <ul style="list-style-type: none"> • Companies • Payrolls within that company • Specified Earning and Deduction Codes
User Entry Permissions	Users are granted authorization to enter time for themselves and/or other users (foreman could enter for a crew or individuals could enter their own time)
Designated Allocations	Users are granted authorization to enter time to specific: <ul style="list-style-type: none"> • Companies • Jobs • General ledger accounts
